"""" :"" Starring – Vidyut Jamwal, Pooja Chopra, Jaideep Ahlawat """" :"" Directed by – Sumit Naurang """" :"" Release Date – 2013 """" :"" Film Songs – Suraiya, Sanjeevani, Sanjeevani Category:Indian action films Category:2010s action films Category:Films shot in London Category:2010s Hindi-language films Category:2013 films Category:Indian films as a carbon source. Under P-starved conditions, however, both the co-expression of \*gspK\* and \*cpcB\* failed to significantly promote the ammonium production in comparison with that in the strain expressing the \*gspK\* only. This seems to be consistent with the report by \*E. coli\* that the co-expression of ammonium assimilation-encoding genes can have a synergistic effect on ammonium production only when ammonium is the preferred nitrogen source ([@B43]). Thus, the enhanced ammonium production in our study was probably achieved by a carbon starvation-induced PC formation ([@B36]). We also noticed that the expression of the \*gspK\* alone did not have any effect on the ammonium production, which is consistent with the report by [@B5]. To study the mechanism underlying the PC formation in our study, we quantified the intracellular concentration of ATP (a global indicator of cellular energy status). It has been shown that the ATP level in the cells is markedly decreased under various P-starved conditions ([@B18]; [@B23]). As such, this study investigated the potential effect of nutrient starvation on the cellular ATP level. Interestingly, we found that the addition of glycerol to a P-starved culture of \*E. coli\* markedly increased the intracellular ATP level. The addition of glycerol may have triggered PC formation to release ATP for maintenance of cell viability ([@B8]). This was also confirmed by the finding that the expression of \*cpcB\* alone did not increase the intracellular ATP level. On the other hand, this study also found that the co-expression of \*gspK\* and \*cpcB\* increased the intracellular ATP level, in contrast to the co-expression of \*gspK\* 2d92ce491b
